“Council uses the EQ-i® instrument, in conjunction with MBTI®, as the fundamental basis for our Leadership Development Program. The EQ-i® tool has seen our emerging leaders learn more about themselves, how they utilise their emotions in the workplace and how their actions and reactions can impact on their effectiveness as a leader. Armed with this insight, it is great to see them practically develop these skills throughout the program.”

CARLIE MCQUILLAN, WORKFORCE PLANNING COORDINATOR, LAKE MACQUARIE CITY COUNCIL

What is Emotional Intelligence?

Emotional Intelligence (EI) is a set of emotional and social skills that influence the way we perceive and express ourselves, develop and maintain social relationships, cope with challenges, and use emotional information in an effective and meaningful way.

Why is EI Important?

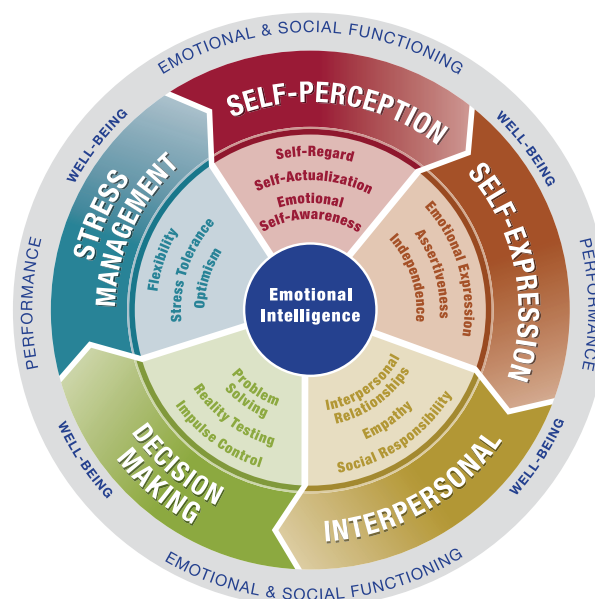

Emotional Intelligence is proven to be a key indicator of human performance and development. People higher in EI communicate effectively, form strong relationships, and create powerful coping strategies. EI can be measured – more accessibly and less controversially than IQ – and unlike IQ, it can be substantially strengthened and developed.

The EQ-i 2.0®

THE SCIENCE BEHIND THE EQ-i 2.0®

For almost 20 years, consultants and organizations have trusted the science that underpins the EQ-i 2.0® (and its predecessor the EQ-i 1.0) to help improve human performance. The EQ-i 2.0 is a psychometric assessment which measures emotional intelligence and how it can impact people and the workplace. Being the first scientifically validated measure of EI, coupled with research from premier organizations, means you can count on the EQ-i 2.0 to add robustness and accuracy to your talent management initiatives.

WHAT DOES THE RESEARCH SAY?

With almost 25% of first-year students leaving before their sophomore year, post-secondary life and education can be challenging. Students often feel overwhelmed, lonely, isolated, and have difficulty adjusting to the demands of college and university.¹ Emotional intelligence is related to both grades and retention. Higher EI, specifically interpersonal and stress management skills, translate into better grades and increased persistence in post-secondary education.^{2,3}
